

(*) General Year Vs Leap Year

↓

365 Days

↓

366 Days

- ① Why there is one day difference?
- ② How we will identify that it's a general or leap year?

Note: Earth time taken to revolve around the sun

→ 365 days 5 hrs 48 min 12 sec.

→ $365.2425 \approx 365.25$

Note: Except century year, if the year is divisible by 4 completely then it will be leap year and for century year divide the year by 400. if remainder is 0 then the year is leap year.

(*) Odd days [0, 6]

We are supposed to find the day of the week on a given date, for this we use the concept of 'odd days'.

In a given period, the number of days more than the complete weeks are called odd days.
